

SSTS Imminent Health Threat Abatement Grant

Pennington SWCD

Clean Water Funds: 2011

Clean Water Grant	\$15,789
AgBMP Loans	\$0
Leveraged Funds*	\$0
Total Project Budget	\$15,789

* Leveraged Funds include required match.

Targeted Water:

County / Watershed Wide

Project Sponsor:

Pennington SWCD

Partners:

Grant Period:

January 2011—December 2012

Project Contact:

Wade Robinson

Project Narrative

This project helped 2 landowners within Pennington SWCD replace previously identified Imminent Health Threat (IHT) Subsurface Sewage Treatment (Septic) Systems. Imminent Health Threat systems are those that are discharging improperly treated human waste onto the ground surface or into surface waters. In addition to the potential water quality impacts, untreated sewage has the potential to introduce bacteria and viruses into the environment. When IHT systems are identified, county or city staff will work with the homeowners on the process required to bring their systems into compliance with the septic ordinance. Low-income households are eligible for grant assistance from the Clean Water Fund to solve Sub-Surface Treatment Systems identified as Imminent Health Threats because of surface discharge or direct connection to surface waters.
