

Easement Delivery

BWSR Grant Profile

January 5, 2018

Grant Description

The Easement Delivery grants were issued through FY17* to assist each SWCD with their site inspection costs and other miscellaneous management activities associated with the easements in their county. These activities include ownership changes, staking boundaries, conservation plan revisions, and assisting landowners with ongoing maintenance of installed conservation practices. Easement Delivery grants are dispersed annually to Soil and Water Conservation Districts as part of the executed SWCD Program and Operations grant agreement or addendum.

Reporting Overview

The Easement Delivery grant does not require a workplan. Expenses should be reported in eLINK, and a description of how the funds were used should be entered in the Actual Results field. The full amount of this grant is paid to the grantee upon execution of the grant agreement.

*As of FY18, Easement Delivery funds are no longer issued via the SWCD Program and Operations grant agreement, and instead are issued through the Master Joint Powers Agreement and Work Order process. However, reporting for FY17 and prior grants must be completed in eLINK through the end of the grant period and until the final report is complete. For more details on FY18 and future Easement Delivery funds, please visit the Easements [Master Joint Powers Agreement \(MJPA\) Information](#) page.
