

Low-Income SSTS Upgrades

BWSR Grant Profile

November 30, 2016

Grant Description

Low-Income Subsurface Sewage Treatment Systems (SSTS) Upgrade grants were awarded through a competitive application process hosted by MPCA. These funds are awarded based on issuance of a Notice of Noncompetitiveness for systems deemed to be imminent threats, or for failing to protect groundwater.

SSTS program details can be found on MPCA's website at <http://www.pca.state.mn.us/ssts>. SSTS program and application questions should be addressed to Aaron Jensen at MPCA at (651) 757-2544 or Aaron.S.Jensen@state.mn.us. Questions on eLINK reporting should be directed to your BWSR Board Conservationist.

Reporting Overview

SSTS Low Income Upgrade grants should be used for on the ground practices that address eligible SSTS upgrades. Activity details, including associated pollution reduction estimates, should be entered. However, these should not be mapped (to protect landowners from being identified as low-income).

This grant does not require a workplan. Expenses should be reported in eLINK, and a description of how the funds were used should be entered in the Actual Results field. The full amount of this grant is paid to the grantee upon execution of the NRBG grant agreement or, in the case of the second year of a biennial grant agreement, receipt of the Notice of Payment addendum.

eLINK Reporting Requirements

Type: NRBG (2013 grants funded by Clean Water Fund)

Administered by: MPCA

Application completed in eLINK? No

Proposed Indicators in Application: No

Grant Agreement distributed through eLINK*: Yes

Exempt from eLINK reporting: No
