

SSTS Abatement

BWSR Grant Profile

February 3, 2016

Grant Description

The Subsurface Sewage Treatment System (SSTS) Abatement grants are awarded through BWSR's competitive Clean Water Fund application process as part of the Clean Water Assistance program. Clean Water Assistance funds are to be used to protect, enhance and restore water quality in lakes, rivers and streams and to protect groundwater and drinking water. Activities include structural and vegetative practices to reduce runoff and retain water on the land, feedlot water quality projects, SSTS abatement grants for low income individuals, and stream bank, stream channel and shoreline protection projects.

Reporting Overview

A workplan must be approved before work can begin on this grant. The workplan should be developed in eLINK using the activities proposed in the application, although BWSR may require additional details at this stage.

Grant recipients are required to report on grant outcomes, activities, and accomplishments in eLINK according to the requirements outlined in the grant agreement and policies within BWSR's Grants Administration Manual. Clean Water Fund grant agreements stipulate that the grantee must "comply with requirements for project signage." The logo may be displayed on legacy-funded construction projects; at access points to any land or water resources restored, protected, or enhanced through Legacy funds; or on printed and other materials funded with money from one or more of the funds. The Legacy logo should be prominently displayed on the grantee's website.

eLINK Reporting Requirements

Clean Water Fund – Subject to all CWF requirements, including use of the Legacy logo.

Administered by: BWSR

Application completed in eLINK? No

Proposed Indicators in Application: Yes

Grant Agreement distributed through eLINK: No

Exempt from eLINK reporting: No
