

Targeted Watershed

BWSR Grant Profile

February 3, 2016

Grant Description

Targeted Watershed grants are funded through the competitive Clean Water Fund application process. Grants are awarded to local government units organized for the management of water in a watershed or subwatershed that have multiyear plans that will result in a significant reduction in water pollution in a selected subwatershed.

Reporting Overview

A workplan must be approved before work can begin on this grant. The workplan should be developed in eLINK using the activities proposed in the application, although BWSR may require additional details at this stage. The workplan will lock upon submittal to BWSR for approval, preventing edits to the approved budget but allowing you to enter expenses and reporting details as work is completed.

Grant recipients are required to report on grant outcomes, activities, and accomplishments in eLINK according to the requirements outlined in the grant agreement and policies within BWSR's Grants Administration Manual. Clean Water Fund grant agreements stipulate that the grantee must "comply with requirements for project signage." The logo may be displayed on legacy-funded construction projects; at access points to any land or water resources restored, protected, or enhanced through Legacy funds; or on printed and other materials funded with money from one or more of the funds. The Legacy logo should be prominently displayed on the grantee's website.

eLINK Reporting Requirements

Clean Water Fund – Subject to all CWF requirements, including use of the Legacy logo.

Administered by: BWSR

Application completed in eLINK? No

Proposed Indicators in Application: No

Grant Agreement distributed through eLINK: Yes
