General Comments (explain any significant notes on the buffer area)

Met on site with Mr. _____ to review the buffer area. Mr. _____ parcel borders the Public Water in question on each side. It was determined from aerial photography that the filter strip on the south side of the Public Water in question meets the minimum requirements for the Buffer Law. Furthermore, Mr. _____ reports that the south filter strip is currently enrolled in the CRP program (not verified).

We measured the filter strip on the north side of the Public Water in question in only 2 places, as the width of the buffer did not vary along the stream. See the attached map for locations where measurements were taken. Mr. _____ reports that his neighbor seeded approximately 14 additional feet of a grass seed mix on the north side buffer. This was observed. At the two locations that the buffer was measured, the width exceeded 50 feet. As a result of the aerial imagery analysis and the site visit conducted on 9/26/2018, Mr _____ parcel is deemed to be in compliance with the Buffer Law and the APO shall be forgiven.
