Prioritize, Target, and Measure Application (PTMApp)

Future Work and Releases

- PTMApp Desktop
  - Fall 2022: Addition of a tool to clip and package GIS data by priority resource point. This will be helpful for Arc GIS users in preparing the data used in your own GIS environment.
  - Fall 2022: A new add on module that allows you to estimate the water quality benefits of your own existing or planned conservation practices.
  - Fall 2022: Process for developing a spreadsheet from PTMApp data that allows streamlined WBIF grant reporting on water quality benefits.
  - 2023: Add newest version of Desktop Model GIS toolbar compatible to latest versions of Arc Pro software and updated manuals.
- PTMApp Web
  - Fall 2022: A few new and updated watersheds (Lac qui Parle, Upper Minnesota, Roseau, and Winona-La Crescent) slated to be added.
  - Winter 2022: Minor web application enhancements and addition of new or updated watershed data.
- Training:
  - Focus on PTMApp web application training over the next 12 months. Look for online training later in 2022.
  - If you or a group of staff are looking for training on running the PTMApp model, please contact BWSR for more information.
